Subject: Research Study

The UC Irvine Department of Psychiatry and Human Behavior is seeking adult smokers and non-smokers, ages 18-45, with ADHD. The research study examines the effects of transdermal nicotine patches on daily behavior and arousal during two 2-day sequences. Eligible participants will receive up to \$240, free blood pressure evaluations and free behavioral profile. For more information, please call Dr. Jean Gehricke at (949) 824-9646.
